24 Rock to Road’s Top 10 under 40
Celebrating the next generation.

PROVIDED BY
CELEBRATING 20 YEARS OF CANADA’S HEAVY EQUIPMENT INDUSTRY

It’s hard to believe two years have passed since the last edition of the National Heavy Equipment Show! 2017 marks a special edition of the show as we celebrate its 20th anniversary. I’m excited to welcome you to this colossal event.

This is Canada’s largest heavy equipment show, and once again we will be welcoming hundreds of exhibitors from the heavy equipment, road building, construction, aggregates and other related industries. A wide variety of exhibitors will present displays featuring gleaming big iron and the latest and most innovative products on the market.

Make sure you check out many of the great features included in the show;
• The Gravel Pit, treating visitors to a huge display of aggregate machinery;
• Rock to Road’s Top 10 Under 40 recognizing outstanding individuals from Canada’s aggregates and road building industry;
• Snow and Ice Removal showcases products, services, equipment and technology for snow and ice removal services;
• Rental Pavilion features the latest equipment, tools, and products for sale or rent to contractors and road building professionals;
• Recruiting Here lets exhibitors hunt for new talent on site, sponsored by Mechanics Hub; and a focus on Safety Products encourages attendees to get up to speed on important industry challenges, such as roadside safety for workers.

This event would not be possible without the generous support of: the Associated Equipment Distributors (AED) and Ontario Asphalt Pavement Council of the Ontario Road Builders’ Association. We are also grateful for the support of our numerous media partners.

Thanks for coming and enjoy the show!

Mark Casack
National Show Manager

The team at Rock to Road is pleased to welcome you to the 2017 edition of the National Heavy Equipment Show.

With the federal government’s whopping $60 billion in additional funds over the next 10 years for the building of transport and energy systems, there is plenty of reason to be optimistic about the future of road building and aggregates in Canada.

If you’re looking at things with a more local lens, things remain equally optimistic in Ontario.

The provincial government’s 2016 Budget featured the largest investment in public infrastructure in its history with a commitment of more than $137 billion over the next 10 years, resulting in approximately $160 billion to public infrastructure investments over 12 years (starting in 2014-15).

With all this investment in infrastructure coming up the pipes, the 2017 edition of NHES couldn’t have come at a better time to ensure your operation is fully equipped with the latest technologies to tackle all of your upcoming projects, ensuring your operation success for years to come.

See you at the show.

Andrew Snook
Editor, Rock to Road
$125B of infrastructure won’t break ground by itself.

Let’s Build.

Canada has big plans for infrastructure development. And to handle a job of this size, you’ve got to have the right tools. With the hardworking mDRIVE™ HD automated manual transmission and 24/7 uptime solutions featuring GuardDog® Connect, it’s no wonder the Mack Granite™ is the #1-selling conventional straight truck in North America.* So build on, Canada, because this infrastructure won’t build itself.

See more at MackTrucks.com/LetsBuild

*Based on IHS Automotive, Polk TIPNet U.S. Class 8 Straight Truck Conventional, 10 liter and larger engines. Report period January 2014 through November 2015.
The National Heavy Equipment Show celebrates 20 years

> The National Heavy Equipment Show, Canada’s largest heavy equipment show, returns for its 20th anniversary edition this April 6 and 7 at the International Centre in Mississauga, Ont.

Held biennially, this event features cutting edge products, big machine displays, and demos from the leaders of the heavy equipment and construction industries.

The 2015 show drew 13,772 attendees to the International Centre. Visitors to the show represented a mix of industry professionals, including the leaders of the construction, road building, land improvement, and infrastructure industries – along with job seekers, students, and those training for specific trades, who were all awestruck by the mammoth equipment onsite.
Rugged Redefined

Earth moving work is tough. So is our PR 716 crawler tractor. We custom-engineer every machine with our own components and energy-efficient technologies. Liebherr crawler tractors are distinguished by:  • Powerfull engine and stepless hydrostatic transmission  • Fuel efficiency due to constant engine speed and Eco-Mode  • Perfect operator comfort for productive work. For more information contact us at 1-800-387-3922.

“We haven’t compromised on anything; why should you?”

The National Heavy Equipment Show will once again include a variety of exciting features, including:

ROCK TO ROAD’S TOP 10 UNDER 40!
Rock To Road magazine will recognize 10 outstanding individuals under the age of 40 from throughout Canada’s aggregates and road building industry, as they present the ‘Top 10 under 40’ at the 2017 National Heavy Equipment Show. The program builds on the success of the 2015 contest, which recognized 10 outstanding individuals across Canada. Going forward this program has been changed from a biannual event to an annual recognition of the industry’s best and brightest in the road building and aggregate sectors. For more information on the program and the nomination process, turn to page 24 of your NHES 2017 show guide.

SNOW & ICE REMOVAL
This is a showcase of the products, services, equipment and technology used in winter management operations – big business when it comes to life in Canada. Check out equipment and network with the top manufacturers, distributors, and dealers from the leading snow and ice management companies.

CRUSHING & SCREENING EXHIBITS
The show will have a large display of working aggregate machinery, including equipment like crushers, conveyors, scales, recyclers, front end loaders, hammers, drives/motors, and so much more!

RENTAL EQUIPMENT
Rental equipment will be displayed, featuring the latest equipment, tools, and products for sale or rent to the contractors and road building professionals who attend the show. This feature offers exhibitors a unique opportunity to influence the rental frequency and volume of both large and small contractors.

RECRUITING HERE
This feature is for exhibitors who are looking to grow their ranks and hire new employees. Participating companies will be given signage to display at their booth, indicating they are on the hunt for new talent. Job-seeking visitors will be asked to bring their resume to connect with prospective new employers.

SHOW HOURS
Thursday, April 6, 2017 from 9 a.m. to 5 p.m.
Friday, April 7, 2017 from 9 a.m. to 5 p.m.

NEW WEBSITE
In recognition of this milestone edition, the show team has launched a brand new National Heavy Equipment Show website: www.NHES.ca.

Located in eastern Toronto, Centennial College’s School of Transportation features the largest on-site transportation and aircraft technology training facility in Canada, offering education and training in:

- Autobody
- Automotive
- Aviation/Aircraft
- Heavy Duty Equipment
- Motorcycle and Powersport
- Truck/Coach

We offer Apprenticeship programs, along with one- and two-year post-secondary diploma programs, including two-year co-op programs in Automotive, Truck/Coach, and Heavy Duty Equipment.

Centennial College School of Transportation
75 Ashtonbee Rd., Toronto, ON

Call 416-289 5000, ext 7606

See where experience takes you.

For complete details, visit www.NHES.ca or follow the show on Facebook at www.facebook.com/NationalHeavyEquipmentShow and Twitter @HeavyEquipShow.
Introducing the new I-Shift with Crawler Gears from Volvo Trucks. It allows drivers to travel at speeds as slow as 0.6 miles per hour and maintain a precise, controlled roll. It’s an ideal automated transmission for applications like pouring curbs or laying asphalt, where low speeds are crucial to doing the job right.

At Doosan, we do more than engineer products. We engineer solutions. Robust compressors that weather the harshest conditions. Generators and light towers that match innovation with efficiency. Unrivaled service and support, day or night. That’s the way we’ve operated for over 100 years, and the way we’ll do business for decades to come.

With a labour shortage looming in almost every skilled trade required in the construction industry, it is more important than ever that companies from across the industry highlight and celebrate the great work being done by their up and coming generation of employees. With that in mind, Rock to Road Magazine is excited to recognize Canada’s best young workers in the aggregates and road building industries for 2016-17.

This year’s chosen nominees will be announced and awarded their Top 10 Under 40 certificates during the National Heavy Equipment Show taking place on April 6 and 7 in Mississauga, Ont.

The program builds on the success of the 2015 contest, which

**Want to Nominate Someone for 2017-18?**

Nominees can come from anyone who is involved in Canada’s rock to road industry, including business owners and management, contractors, equipment operators, technicians and research and development.

Here are the general guidelines for next year’s Top Under 40:

- Nominees must be younger than 40 before December 31, 2017.
- Nominees must either be working in Canada or of Canadian nationality.
- Nominations are due by March 2018. Submissions are accepted year-round for the program.

**Who Can Nominate Someone?**

Nominators can include advisors, supervisors, coworkers, or colleagues familiar with the nominee’s work and character.

**What Type of Information Should Be Included About the Nominee?**

Potential information to submit about the nominee can include (but is not exclusive to): Projects or initiatives the individual is or has been involved in; results from past projects; day-to-day job responsibilities; workplace initiatives outside of regular job duties; and community involvement.

**Is a Secondary Reference for the Nominee Required?**

No. However, the nomination form includes fields for a secondary reference, which is suggested to include.

**Where Can I Find More Answers About the Top 10 Under 40?**

For more information on the Top 10 Under 40, visit www.rocktoroad.com or contact Andrew Snook, editor of Rock to Road at asnook@annexweb.com.
Now the Two of You Can Talk.
More Control. Fewer Cables.

CrossLinc Technology™, now inside the New Flextec® 350X welders and LN-25X feeder. On larger job sites, welding power sources are often hundreds of feet away from the work at hand, and there’s no reliable way to control voltage at the feeder — until now. CrossLinc Technology sends voltage information across a standard weld cable without the use of an additional control cable, improving safety, productivity and weld quality. Learn more at www.lincolnelectric.com/crosslinc

NATIONAL HEAVY EQUIPMENT SHOW
TORONTO • ONTARIO • CANADA
